The FBI Uniform Crime Reporting program is comprised of two different data collection systems, Summary Based Reporting (SBR) and Incident Based Reporting (IBR). The Milwaukee Police Department records and reports all data to OJA/FBI, and in our COMPASS Map, in IBR format. OJA converts this IBR data to SBR values, as seen in this report. IBR and SBR cannot be directly compared because the counting methods are different. For example, SBR applies the UCR Hierarchy Rule: when more than one Part I offense occurs in the same incident, the offense that is highest on the hierarchy list is counted and the other offenses are ignored. (p. 10 FBI UCR Handbook). IBR counts all the offenses that occurred in an incident.

Uniform Crime Reporting data, using the heirarchy rule, is the method used to compare crime rates of major city police departments.

Due to the nature of Incident Based Reporting, these values are subject to change for up to two years from the Reported Date.
